

- Carbon, Soot & Graphite
- Heavy Oils Tars & Solvent based products
- Water Repellent Grease & Waxes
- Light Oils, Grease & Soil
- Protein Deposits

CheetahFast is now the fastest and safest way to get the dirtiest working hands "finger-snapping" clean, with or without water! No greasy film, no sticky residue. And, it does it all without petroleum solvents, mineral spirits or alcohol. By integrating a unique combination of surfactants with Lanolin, Aloe Vera, Mineral Oil and Vitamin E, your hands will feel cleaner and healthier than ever before. It even helps prevent dry chapped skin and promotes healing of minor nicks, cuts and abrasions.

### BioSol™ CheetahFast: The fastest animal on earth!

There always seems to be a trade-off: hand cleaners that get the job done are so full of harsh solvent and pumice that your hands feel raw just after one wash, while others contain so many skin conditioners that coffee break has come and gone by the time your hands are clean! The way we look at it, your hands work hard enough, so you shouldn't have to work hard to get them clean.

BioSol™ CheetahFast goes to work instantly, safely removing and encapsulation the heaviest greases from your skin in lightening speed. Both lab and field tests have shown that even the toughest grease is no match for CheetahFast, as it is easily lifted from the skin in less than 20 seconds! But don't be intimidated by its tough image, BioSol™ CheetahFast is as soft and gentle as a kitten, keeping your hands feeling great no matter how many times they are washed.

#### Performance features & Benefits:

Need a fast alternative? CheetahFast wins... hands down!

- No alcohol or petroleum solvents
- Fast acting formula, super-concentrated
- Can be used with or without water
- Phosphate-free, no hidden toxins
- Skin conditioners promote healing of minor cuts
- No greasy residue, no tacky film
- Fresh scent, fully biodegradable ingredients
- No pumice or other fillers to clog drains

#### Product Applications:

CheetahFast technology works efficiently to remove:

- Bitumen, heavy oil, asphalt, distillate's
- Axle grease, graphite, silicone, tar, carbon
- Printer's ink, adhesives, gear grease
- Fats, putty, shellac, cement, rust oxides
- Fresh paint, varnishes, fresh industrial coatings
- Industrial soils, lube oils, glue, lipstick
- Solvent based adhesive residue
- Coal dust, graphite, soil

#### Directions for use:

You can use BioSol™ CheetahFast with water, much like hand soap, or without. Either way, CheetahFast is the quick and easy answer to clean hands and healthy skin.

#### General Use

Place an amount the size of a quarter in the palm of your hand. Rub your hands together with good pressure. For extra soiled hands, apply a fine, soft bristled brush, rubbing in a small, circular motion. If using with water, rinse hands thoroughly and dry.

If you are using BioSol™ CheetahFast without water, apply a similar amount to the palm of your hand and wipe clean using a paper towel or cloth, drying hands thoroughly.
