

- Carbon, Soot & Graphite
- Heavy Oils Tars & Solvent based products
- Water Repellent Grease & Waxes
- Light Oils, Grease & Soil
- Protein Deposits

Non-toxic and non-corrosive, EverSol is a multi-surface spray cleaner that does away with the need for highly corrosive and poisonous cleaners. It's the only one you need to get things done... better, faster, and easier. No diluting, no etching, no streaking, no greasy residue. Just a clean and natural finish on plastics, vinyl, rubber, aluminum, plexiglass, stainless steel, porcelain, marble, grout, linoleum, chrome, laminated wood, painted walls, ceramic tile...even many fabric stains!

### BioSol™ EverSol: The Only One You Need!

Most shops seem to amass quite an arsenal of specialty products to meet the cleaning demands of one job area, and that can get expensive. Our customers asked us to develop something that would replace all of those products, one that would really "do it all" when it came to lighter-duty cleanups. We responded with BioSol™ EverSol.

#### Performance features & Benefits:

Best of all, you can use EverSol with a clear conscience!

- Cuts grease and oily dirt on contact
- Replaces poisonous, harsh chemicals
- Non-toxic, biodegradable, phosphate-free
- Eliminates the need for multiple products
- Ozone-friendly, fully biodegradable
- No butyl, chlorine, ammonia or petroleum solvents
- No toxic fumes, no harsh ingredients
- Will not etch glass; clean, fresh scent
- Non-corrosive, non-flammable
- Not poisonous to animals or vegetation
- Safe for municipal sewage systems
- Not controlled under WHMIS or TDG

#### Directions For Use

**General-purpose:** Spray, allow to stand a few seconds, then wipe with clean cloth. Not recommended for use on untreated leather or genuine wood surfaces as product may dissolve natural oils.

**Soap scum, tub, and tile:** Apply, let stand for 1 minute. Wipe surface with wet sponge. Rinse away excess.

**Heavier jobs:** Spray and allow to soak about 30 seconds. Stubborn stains may require some light scrubbing. Wipe with clean, damp cloth. Repeat if necessary.

**Fabric stains:** Test on hidden area first to ensure color fastness and condition of the fabric before use. Spray directly onto stain. Let stand about 30 seconds. Do not rub. Apply pressure to affected area with dry, absorbent towel to blot up excess. Repeat if necessary until stain disappears. Rub gently to lift nap of fabric. Allow to dry.

#### Product Applications:

It's the solution for a whole new generation and a variety of different uses:

- Aircraft, marine & auto interiors
- Stovetop, counters, exhaust fan hoods
- Workshops & repair centers
- Office equipment, fixtures
- Bathrooms, tub & tile
- Barbecues, whitewall tires
- Commercial kitchens
- Walls, appliances, fixtures
- Sinks, countertops
- Vinyl wall coverings, linoleum
